SUMMARY

Engineer who supports and improves Azure enterprise applications, SQL data platforms, and production integrations. Mix of BAU troubleshooting, automation, DevOps, and development across Azure Data Factory, Microsoft Fabric, APIs, and Terraform.

WORK EXPERIENCE

Griffith University

Development Engineer

Brisbane, Australia

Oct 2025 – Present

- **Enterprise Application Integration:** Built Azure Data Factory daily incremental pipelines delivering **800K ServiceNow records** in only **200 API requests**; snapshot-based delta detection sends only changed records for student analytics and timely support, with batch-insert optimisation reducing runtime from **6 hours to 10 minutes**.
- **Enterprise Data Modernisation:** Mirrored PeopleSoft and DataHub into Microsoft Fabric using Fabric Mirroring and OneLake shortcuts into a lakehouse; transformed program data into Silver-layer tables with PySpark and dbt, and exposed it through a GraphQL API, reducing reliance on legacy ODI ETL and contributing to licensing and maintenance-cost savings of **\$100k p.a.**
- **DevOps & Azure Automation:** Architected reusable Terraform modules provisioning **100+ Azure resources** across five environments and three subscriptions, with private endpoints and least-privilege RBAC.

Tech: Azure (ADF, Fabric Mirroring, lakehouse, Function Apps), OneLake shortcuts, PySpark, dbt, Terraform, SQL, GraphQL, CI/CD

Codify

Software Engineer

Brisbane, Australia

Sep 2024 – Jul 2025

- **Operational Troubleshooting:** Productionised an Azure infrastructure health dashboard monitoring **12,000** daily Function App schedules and database utilisation; identified N+1 query patterns and informed a remediation patch that reduced peak database usage by **30%** and weekly timeout errors by **60%**.
- **Production Support Fix:** Delivered database-schema and API changes enforcing multi-tenant data isolation with *tenant_id* foreign keys and row-level security, eliminating a defect causing **100+** false production support tickets.

Tech: Azure, .NET, C#, SQL, TypeScript, Python

DLTx Labs

Software Developer

Brisbane, Australia

May 2023 – Sep 2024

- **SQL, Integrations & Development:** Delivered the company's first end-to-end billing flow across UI, APIs, and third-party integrations. Replaced a NestJS ORM query bottleneck with hand-tuned SQL, cutting payload size by **98%** and improving transaction-retrieval latency **20x**.

Tech: NestJS, SQL, Node.js, REST APIs

PROJECTS

[lucius.capital](#) – Independent Design & AI-Assisted Build

- Led stakeholder interviews and creative direction, defining brand positioning, visual mood, and a consistent component library; delivered end-to-end UI implementation while stress-testing AI-assisted development workflows.

TECHNICAL SKILLS

- **Languages:** SQL, Python, PySpark, TypeScript/JavaScript, C#
- **Applications & Data:** Azure Data Factory, Microsoft Fabric (Mirroring, OneLake shortcuts, lakehouse), dbt, Databricks
- **Integration & APIs:** REST APIs, GraphQL, ServiceNow, SFTP, Oracle ODI
- **Cloud & DevOps:** Azure Function Apps, Terraform, Docker, Linux, CI/CD, RBAC
- **Practices:** ETL/ELT, incremental synchronisation, observability, performance optimisation, troubleshooting

CERTIFICATES & EDUCATION

Claude Certified Architect – Foundation

Anthropic · May 2026

Azure Developer Associate

Microsoft · May 2025

Bachelor of Information Technology (Computer Science)

Queensland University of Technology

Dean's Scholar Award · GPA 91%

Graduated 2022
